Hello, happy post-lecture jumpscare surprise part 2 🍌

Note: Unlike the lecture bees 🐝🐝🐝, this is **not an April Fool's joke** - Midterm 2 is indeed happening (vote 🤔 / 😬 in the poll below!).

Exam Logistics

Midterm 2 is scheduled for **Wednesday, April 8th from 8:00 to 10:00 PM PT**. Please read all information on this post and the linked documents very carefully!

Adjustments Request Form

The exam will be *in-person* only. Seating will be assigned. The Midterm Alterations Request form was sent out in [#616](#) and was due last Monday, March 23rd at 11:59pm, and you'll know if your adjustments were approved when we send out seating assignments on or before **Monday, April 6th**.

DSP Accommodations

Please submit your Letter of Accommodation to the DSP portal **as soon as possible**. We will process LoAs on a rolling basis, but may not be able to process last-minute LoA submissions.

We will be proctoring all exams by ourselves. You do not need to contact DSP Proctoring for any accommodations. However, if you were DSP Proctored for MT1, we may reach out to you to continue DSP Proctoring.

Exam Scope

Midterm 2 will include all class content up to and including **lectures 1-26, homeworks 1-7, projects 0 - 4D, and discussions 1-11**, with an emphasis on post-Midterm 1 material. For **discussion 11**, only the Hashing I questions will also be in scope; expand the below to see the list.

▼ Expand

Regular Disc 11: Q2 a-b, Q3a, Q4a-b

Exam-level Disc 11: Q3a-b (exam-level Q3 is the same as regular Q4)

Note: since only Hashing I is in scope, you can expect hashing to be lightly tested, i.e. at most a couple short questions.

General Exam Logistics

The exam will begin promptly at **8:10 PM**. You will have **110** minutes to complete the exam. Exam materials will be passed out at 8PM, so we encourage you to show up to the exam room by 7:55 PM to get situated and receive all your materials on time.

Allowed Materials

- **Two** double-sided, US letter-sized sheet of **handwritten** notes (referred to as "cheat sheet")
 - Printed-out notes that are handwritten on a tablet are **NOT** acceptable.
 - Printed diagrams, screenshots, and typed text are **explicitly disallowed** and will be confiscated if seen during the exam.
 - Four single-sided sheets are not allowed.
- Cal ID card
- Writing implements (pencil, pen, eraser, highlighter)
- Course staff will provide the exam packet, reference sheet, and scratch paper

Other Logistics

The **reference sheet** and **seating assignments** have been released here: [#924](#) (will be made public before 4:30PM; still waiting on some seating assignments).

Past Exams

The following past exams have been released for practice on the [course website resources page](#). We do not plan on releasing score distributions for past exams. Please ask any questions about specific exams in their respective megathread:

- Fall 2025: [#805](#)
- Spring 2025: [#804](#)
- Fall 2024: [#803](#)
- Spring 2024: [#802](#)
- All Other Exams: [#801](#)

Review Sessions

Course Staff:

- Exam Review Session Part 1: [#618](#)
- Exam Review Session Part 2: [#773](#)

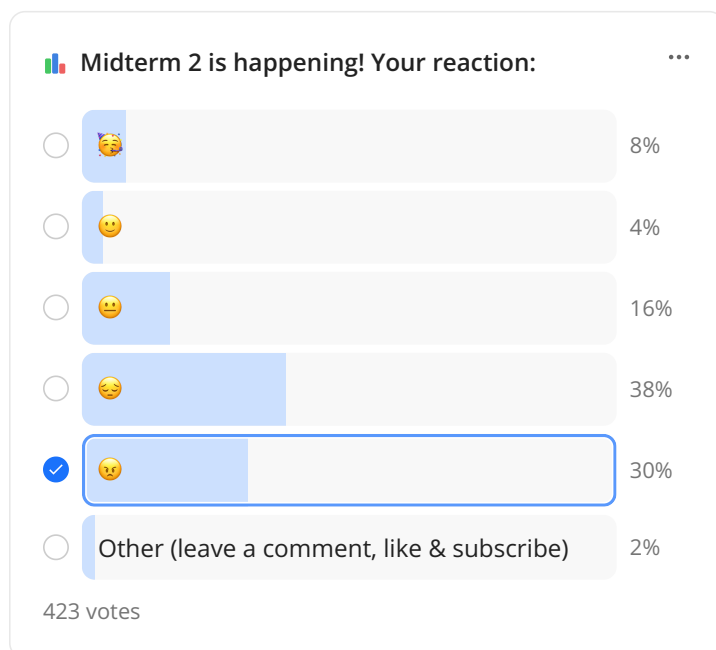

[No official affiliation] HKN: [#800](#)

[No official affiliation] CSM: [#775](#)

Study Tips

Unlike Midterm 1, this exam will mostly resemble the format of past Midterm 2 exams. As you start studying for the midterm, check out some of the exam resources from the website!

- [Study Tips](#): Here are some study tips we've written up to help you prepare for the midterm!
- [Past Exams](#): We've released a collection of exams from past semesters that you can practice with.
- [Problem Bank](#): If you're struggling with certain concepts or types of questions, use the problem bank. You can sort/filter the problems by topic, difficulty, and question type!

Week 12

Apr 6

Midterm 2 is 4/7 8–10pm. Good luck!

I think the course website has the wrong exam date 🤔

♡ Reply ...

K Karen Meng **STAFF** 42m #781cbf

Oh OOPS lemme fix that rq (please don't come to the midterm tonight 😭)

Edit: done

♡ 1 Reply ...

Anonymous Falcon 1h #781cbd **Unresolved**

Do the past exams from Spring 2024 to Fall 2025 cover the scope of all the topics? So like if we did all four of them, we would've done a problem related to each topic at least on time?

♡ Reply ...

K Karen Meng **STAFF** 39m #781ccb

I think so, if you're referring to general topics

♡ Reply ...

Anonymous Falcon 37m #781ccc

Yeah, like the general topics from each of the lectures, cause I wanted to know if I did those past exams, would I be prepared to answer most of the questions on the midterm (cause they revolve around a similar problem type)

♡ Reply ...

K Karen Meng **STAFF** 33m #781ccd

↩ Replying to Anonymous Falcon

Yes for general topics

♡ Reply ...

Anonymous Falcon 17m #781cda

↩ Replying to Karen Meng

Would it be better if I redo the discussions instead of doing let's say 2 extra practice tests to be prepared for all types of problems?

♡ Reply ...

Anonymous Hummingbird 2h #781cab **✓ Resolved**

Are we going to be required to know how to iterate through Graph objects? Different exams/lecture seems to have a different implementations of it.

♡ Reply ...

I Isaac Tieu **STAFF** 2h #781cac

Could you provide some examples please?

For example, iterating through a tree to perform a tree traversal (like DFS) is certainly in scope. In cases like these, we would typically provide a Node class for you to work with.

♡ Reply ...

Anonymous Hummingbird 2h #781cad

in Spring 23 Final Q8A, they use Graphedge, neighbors() instead of the V(), adj() that we were using with the graphAPI

♡ Reply ...

 **Karen Meng** STAFF 2h #781cae

↩ Replying to Anonymous Hummingbird

If necessary, this will be provided in the question.

♡ 1 Reply ...

 **Isaac Tieu** STAFF 2h #781caf

↩ Replying to Karen Meng

Also wanted to add that `GraphEdge`, `neighbors`, etc. can be found in the [ref](#) sheet from that exam!

Anonymous Ant 2h #781bff

✓ Resolved

When do we resize in a hash table? Is it when we reach the load factor, or is it only when we exceed the load factor? Also, is it done after adding an item or before adding an item?

For example, the limit is 0.75. After I add a value, the current load factor becomes 0.75. Do we resize immediately, or do we wait to add 1 more item, and before adding, we resize?

♡ Reply ...

Isaac Tieu STAFF 2h #781caa

In your example, you should resize immediately as shown in this [slide](#).

(you can also see the transition from slide 28 to slide 29)

♡ Reply ...

Anonymous Jackal 4h #781bfd

✓ Resolved

For the cheat sheet, what is a letter sized sheet? Is that just a 8.5" x 11" normal sheet of notebook paper?

♡ Reply ...

Karen Meng STAFF 4h #781bfe

8.5 x 11 inches

♡ Reply ...

Anonymous Hummingbird 4h #781bfb

✓ Resolved

Someone mentioned that sorting was not in scope; does that mean topological sorting won't be in assessed?

♡ Reply ...

Karen Meng STAFF 4h #781bfc

Topo sort is **in** scope; sorting post mt2 (e.g. Lec 32-37) is out of scope.

♡ Reply ...

Anonymous Curlew 6h #781bef

✓ Resolved

Hi, I was wondering if the reference sheet is going to be similar to what we had in mt1?

♡ Reply ...

Karen Meng STAFF 6h #781bfa

Yes, very similar. Released in T minus ≈ 3 hrs

Is dms in scope? i dont remember a lecture covering this

♡ Reply ...

K Karen Meng STAFF 7h #781beb
Nope

♡ Reply ...

Anonymous Hamster 9h #781bdc ✓ Resolved
Is there a list that has past midterm questions sorted by topic?

♡ Reply ...

K Karen Meng STAFF 9h #781bde
See the linked problem bank in the post. Though this is not consistently updated, so more recent exams questions aren't included there.

♡ Reply ...

Anonymous Oryx 9h #781bdb ✓ Resolved
will style be enforced? e.g. will I get docked points for naming a variable VarOne instead of varOne, for example

♡ Reply ...

K Karen Meng STAFF 9h #781bdd
From the front page of past exams:

Your answer will be reformatted according to the 61B/61BL style guidelines. For example, any method, constructor, or if-statement requires at least three lines for the purposes of determining line count.

If you're referring to small mishaps like `varOne` vs. `VarOne`, we usually are fine with those, unless it is ambiguous. We reserve the right to dock points for these types of typos.

♡ Reply ...

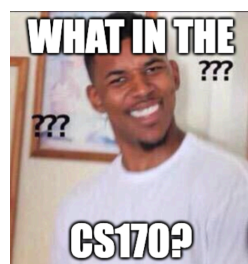

Anonymous Oryx 9h #781bdf
Alright, thanks for the response!

♡ 1 Reply ...

Anonymous Albatross 19h #781bcb ✓ Resolved
will reduction also being tested (lecture25)

♡ Reply ...

K Karen Meng STAFF 19h #781bcd

Reductions are out of scope

♡ 4 Reply ...

Edit: 200% coming out later, before 4:30PM

♡ 3 Reply ...

 Anonymous Narwhal 1d #781bba **✓ Resolved**
Are hidden lecture slides (marked with the slashed eye icon, don't show up in presentation mode) out of scope?

♡ Reply ...

 Karen Meng **STAFF** 1d #781bbb
Uhh I think some of those are in scope. If they're hidden AND blue AND tagged as optional, they are out of scope. If it is just hidden, feel free to send the slide(s) here and I'll check.

♡ Reply ...

 Anonymous Leopard 1d #781baf **✓ Resolved**
Hi I'm currently going through the slides and was wondering whether there would be focus placed on data structures that we deemed inefficient. Like for disjoint sets, is it reasonable to focus more on weighted quick union rather than a set of sets since it is far more time effective? Thanks!

♡ Reply ...

 Karen Meng **STAFF** 1d #781bbc
We cannot reveal what exactly will be emphasized on the exam, just post-midterm-2 content.

♡ Reply ...

 Jerry Fu 1d #781bab **✓ Resolved**
I am currently viewing the gitbook and was wondering what chapters on that resource would be beneficial for studying? Would it be all chapter 1(Introduction)-24(Hashing)? Thank you so much!

♡ Reply ...

 Karen Meng **STAFF** 1d #781bac
Copying private post response here, w/ minor edit:

We aren't actively reviewing the gitbook due to limited staff bandwidth, so it is possible that there are extra parts in the gitbook that are not in scope for the exam. It's unlikely that there will be topics missing from the gitbook that are in scope, but if you are ever unsure (about specific topics), feel free to ask in the Midterm 2 Main Post and we can help clarify.

♡ Reply ...

 Jerry Fu 1d #781bad
Im here in the main post. Can I get clarified please 🙏

♡ Reply ...

 Karen Meng **STAFF** 1d #781bae
↩ Replying to Jerry Fu

Sorry, I/staff unfortunately don't have the bandwidth to review all 24 chapters to verify what is in or out of scope by Wednesday... If you have a specific topic you'd like to ask about, feel free to ask here.

Notes off the top of my head: reminder that only Hashing I (based on the lecture slides) is in scope, and that A* is out of scope this semester.

♡ Reply ...

 **Anonymous Gorilla** 1d #781afe ✓ Resolved

do you guys think it would be a good use of time to write down the time complexity for the operations for each data structure/alg we learned on our cheat sheet?

♡ 2 Reply ...

 **Karen Meng** STAFF 1d #781aff

If you have space, definitely wouldn't hurt! As always, I'd encourage you to not blindly copy down runtimes, and still take time to understand how that runtime was derived (think of putting on your cheatsheet as a "reminder", not as a "ok it's on my cheatsheet so I'll just copy from my cheatsheet during the exam").

♡ Reply ...

 **Anonymous Wren** 2d #781afb ✓ Resolved

can i write my cheat sheet on graph paper cuz ocd reasons

♡ Reply ...

 **Karen Meng** STAFF 2d #781afc

♡ Reply ...

 **Anonymous Wren** 2d #781afd

lovely thank you

♡ 1 Reply ...

 **Anonymous Tiger** 2d #781aef ✓ Resolved

Just wanted to ask out of curiosity: Why are we not allowed to write our cheat sheets on a tablet and then print? In other classes, they just have the rule of no screenshots, typed text, etc, which makes sense in my mind. But wouldn't paper handwriting and tablet handwriting be the same?

♡ 1 Reply ...

 **Karen Meng** STAFF 2d #781afa

But wouldn't paper handwriting and tablet handwriting be the same?

Try fitting this on paper... This was written on an iPad

(this is not 61B but is a pretty good example of how one can easily cram much more info onto an iPad, making it unfair for those who don't have an iPad/tablet/etc.)

Edit: see [#898a](#) for an anecdote

♡ 2 Reply ...

 **Anonymous Jackal** 2d #781aed ✓ Resolved

whats the reference sheet for this exam? where can I find it?

do we need to know code implementations for prim's, kruskal's, topological sorting, and dijkstra's?
 Reply ...

 **Karen Meng** STAFF 6d #781ba
Technically those are in scope, so there is a non-zero chance of them being asked. I would recommend however to not blindly memorize the implementation / cram it onto your cheatsheet, and instead just understand how in general they work (and of course make sure you understand Java syntax from Midterm 1).

For graph-like past exam coding questions, see Anirudh's Yokeyrin's Cave question from Fa24 mt2, as well as Aditya's Math Dags question from Sp25 final.

 Reply ...

 **Anonymous Loris** 9h #781bda
Do you have any advice on how to get prepared for coding questions. Whenever I see a question like Yokeyrin's Cave, I don't even know where to begin. I have taken three practice midterms and am consistently failing them. Do you have any advice on how to improve?

 Reply ...

 **Anonymous Lemur** 6d #781ad ✓ Resolved
Will the reference sheet be the same as fall 2025's reference sheet?
 Reply ...

 **Karen Meng** STAFF 6d #781ae
Likely not - we're thinking of adding more things to our reference sheet to make it more standardized for future semesters, but it will be highly similar. Per the post, we'll make an Ed announcement once it's been released.

Anonymous Quail 6d #781b

✓ Resolved

Do you think we need to review past midterm 1's since midterm 2 is comprehensive? Also, were midterm 2's from previous semesters comprehensive as well?

Thanks!

♡ Reply ...

Karen Meng **STAFF** 6d #781c

Midterm 2 has always been comprehensive (at least since like Fa23 or so), so it will include content from mt1, which may be worth reviewing a bit. However, there is a pretty big emphasis on post-mt1 content (as you will see from past mt2 exams), so I'd definitely recommend prioritizing past mt2 exams over mt1 exams.

♡ 2 Reply ...
