

ECON 100B: Intermediate Macroeconomics
Section Syllabus
Spring 2026

Name: Felix Zhang

Contact: felixzhang04@berkeley.edu

DIS 105: Mon & Wed, 2:10 – 3:00pm @ Evans 9

DIS 112: Tue & Thu, 4:10 – 5:00pm @ Dwinelle 254

Office Hours: Monday, 3:00pm – 5:00pm @ Evans 542

*Feel free to attend the professor's OH or other GSIs OHs if you are unable to make the listed time

Section Overview:

Discussion sections are designed to help students better explore the course materials through reviews of concepts and questions covered in lectures, discussions on related prompts, and practice with example problems. Although attendance is not mandatory, it is highly recommended, as these activities will help you to prepare for assignments including problem sets and exams as well as build analytical tools for further studies. Additionally, attendance and participation in sections will enhance your understanding of macroeconomics and its applications to the world.

Enrollment Related Questions:

We will allow unofficial changes in sections only in cases where students have a time conflict with another lecture/section. If you are in this situation, please email both GSIs: the one from the section you are leaving, and the one from the section you are joining, explaining the issue and asking for permission; attach proof of the class conflict.

Unfortunately, course staff do not have control over the official enrollment for sections on CalCentral. Please contact the head GSI of the Economics Department for any additional enrollment related issues or questions (headgsi@econ.berkeley.edu).

Contacting Me:

If you have any course content or logistical questions outside of discussion section or office hours, please email me with 'ECON 100B' in the subject line. Please allow for a 48-hour time frame to respond, and feel free to contact me again if you haven't received a response after that. I also suggest using Ed as much as possible for this course as you may receive quicker responses from both staff as well as other students.

I appreciate hearing feedback from you throughout the semester. Don't hesitate to contact me with any suggestions for improvements to create a better learning environment.

Limits to Confidentiality

As UC employees, all course instructors and tutors are "Responsible Employees" and are therefore required to report incidents of sexual violence, sexual harassment or other conduct prohibited by university policy to the Title IX officer. As instructors, we cannot keep reports of sexual harassment or sexual violence confidential; we must contact OPHD as soon as possible (<https://ophd.berkeley.edu/responsible-employee-obligations>). The Title IX officer will however consider requests for confidentiality. There are confidential resources available to you, including the PATH to Care Center Team (<http://sa.berkeley.edu/dean/confidential-care-advocate>), which serves survivors of sexual violence and sexual harassment.

Special Accommodations

If you require disability-related accommodations for assignments or class or any other needs, please email or speak with me and/or the Professor of the course as soon as possible. For accommodations, you must also obtain a Letter of Accommodation (LOA) from Disabled Students' Program (<http://dsp.berkeley.edu>, 260 César Chávez Center) which they send electronically to the instructor of record. Accommodations are not offered retroactively.

Academic Integrity

University policies on academic integrity will be strictly enforced. Please remember the honor code: "As a member of the UC Berkeley community, I act with honesty, integrity, and respect for others." The hope and expectation is that you will adhere to this code. Please contact me or the instructor if you have any further questions.

Submitting fully AI generated work is considered a violation of academic integrity policies and students that submit AI-produced work will face the full consequences of their actions. We understand that AI may have a place in the classroom and do allow it for specific use cases, such

as a tool to understand a concept or topic (although we encourage leveraging the lectures notes, textbook, or Office Hours to do this first) and to clean up originally produced code or writing. If you do use AI on any of your assignments, we ask that you include a footnote referencing that you used the tool and the specific use case. Because you will not have access to AI tools on the Midterm and Final exams and because we aim to develop strong critical analysis of macroeconomics topics, we discourage an overreliance on the usage of Artificial Intelligence in this course.
