Midterm 2 and related announcements

Dear Class, here are some Midterm-2-related announcements:

Midterm 2 will have the same format as Midterm 1: 75 minutes, split across three parts (True/False/Uncertain, Empirical, and Analytical). Unlike Midterm 1, there will be more points for Midterm 2 awarded on the T/F/U and Analytical sections than on the Empirical section, as a reflection of the time that those questions will take you. The T/F/U section will be worth 60 points. The Empirical section will be worth 30 points. The Analytic section will be worth 60 points.

Midterm 2 will cover material since Midterm 1. That means that the Midterm 2 T/F/U will cover Lecture08_laborsupplyandtaxincome.pdf through Lecture14_local_ch10_2026.pdf up to where we stopped yesterday (the slide "AvenancioLeon-Howard (2022): Not race neutral"). The Midterm 2 Empirical section will cover the same, which includes the regression representation in Lecture08B_Event_Study_2026.pdf and Lecture08_laborsupplyandtaxableincome_liveanalysisinclass_compiledtopdf.pdf. The Midterm 2 Analytic section will cover Lecture07_optimallabortax_ch2021.pdf through Lecture11_externalities.pdf. (The Midterm 2 Analytic section will not cover this week's section material.)

In terms of difficulty, I expect Midterm 2 to be more similar to the 2024 sample midterm than to our 2026 Midterm 1 which was a little less difficult.

I will hold office hours on Monday 4/6 11-11:30am and 2:30-4pm.

I will lecture live in class on 4/6 after the midterm, after a short break and for the remainder of the class until 8pm. I will not take iClicker attendance for the 4/6 lecture, since DSP students will not be able to attend live.

I will not be able to lecture live on Monday 4/20. Instead, I will post a full lecture video.

Finally, the final exam in May will be cumulative and will cover all material covered in this course from beginning to end.

Best,

Prof Yagan
